XLActuary®

"Your own actuary inside Excel"

Welcome to XLActuary, a member of the ARMONTech family of technology solutions for the benefits professional.

Do you feel burdened by all these?

Lump sum factor • Static tables • PBGC rate PPA • Check factors • Generational tables Segment rates • New methods • Update tool

Then XLActuary is the tool for you!

What is XLActuary?

XLActuary is an Excel add-in designed to handle all the actuarial factor calculations for actuarial consulting firms and retirement administration providers.

Use XLActuary's functions like other standard Excel functions.

What can XLActuary do for you?

- Calculate the most commonly used actuarial factors, including:
 - ✓ Lump sum factors
 - ✓ Conversion factors
 - ✓ Early ret. factors
 - ✓ Discount factors
- Use any interest rate structure, including:
 - ✓ Segmented rates (e.g. PPA)
 - ✓ Deferred and immediate rates (e.g. PBGC)
 - ✓ Select and ultimate
- Use standard, published tables or any set of mortality rates
- And much more...

You can also use XLActuary to help check results from other administration or valuation systems.

There's more!

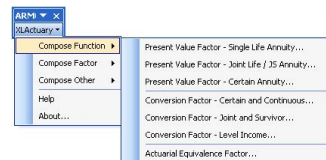

With a single click of a button:

- Calculate any factor
- Write out labels for all inputs
- Show results with a standard look and feel

	A	B	C	D	E
1					
2		Present value of a single life annuity			
3		Deferred mortality table	AMT2008		
4		Age shift for deferred mortality table	0		
5		Immediate mortality table	AMT2008		
6		Age shift for immediate mortality table	0		
7		Interest assumption code	2		
8		Interest rate value / range	ppaRates		
9		Number of payment periods in a year	12		
10		Calculation age	58		
11		Age when payments start	65		
12		Number of years payments are made	999		
13		Number of years payments are guaranteed	0		
14		Number of digits to round result	4		
15		Factor	6.9019		
16					
17			ppaInterestRates		
18		First segment interest rates	5	5.28%	
19		Second segment interest rates	15	5.95%	
20		Third segment interest rates	999	6.45%	
21					

If you do not like typing long complicated formulas, let XLActuary's toolbar routines do all the typing and formatting for you!

- No more need to memorize function syntax and required input items
- Eliminate potential errors due to incorrect usage of the functions
- Allow others to easily check your calculations

XLActuary makes actuarial calculations easy!

What do you get with XLActuary?

- Free upgrades (including newly published mortality tables and new methodologies)
- Easy setup and installation
- User training and technical support
- On-line help facility
- User documentation and reference

Do not calculate another lump sum factor before checking out XLActuary.
